ITEMS FOR INVESTORS. Lackawanna Steel established a new record for earnings in May, in which month net for stock was at 35 per cent. April showed 39 per cent. and June should show larger earnings than in May, so that profits for the second quarter should be over 9 per cent. on the \$34,750,000 stock. The question of dividend payment, it is thought, will be considered at the July meeting, when final reports for the half year will be available.

Two of the Bear's lifeboats were swept toward the shore and compelled to make a landing through the surf. While in the surf, the boats collided and both capsized. A woman passenger's dog was said to have been responsible for the capsizing of the boats. According to one of the survivors the dog fell overboard. The woman who owned it reached out for the animal and in doing so knocked one of the oars out of the oarlock. This caused the boat to veer into the other lifeboat and both turned over.
